<p><b>Doug LaMalfa</b>  <b>U.S. Representative, District 1</b>  <b>Family Farmer/Member, United State House of Representatives</b></p> <p>America’s middle income families, workers and small businesses are struggling to make a better life and our nation faces serious threats from terrorism. The values I learned growing up on the family farm are needed in Washington and I am working hard to bring those North State values to Congress.  As your representative, I have:  PASSED legislation in the House of Representatives to protect north state water and build new water storage, including Sites Reservoir. This project means jobs and water for our district.  VOTED for significant tax reductions for Families, Small Businesses &amp; Farms. I’m proud to be endorsed by the Howard Jarvis Taxpayer’s Association.  WORKED to slash debt and waste and balance the federal budget.  VOTED to increase America’s national security, strengthen our military and help our veterans get the care they deserve.  FOUGHT to defeat President Obama’s new oil tax, repeal Obamacare and reign in out of control federal bureaucrats and tax-hikers.  Government cannot and should not do everything. When big government is the problem, more government is not the solution. I’d be honored to receive your vote. I am a former judge and a veteran. As a judge, I kept the original meaning of the Constitution foremost in my mind. We deserve to have fewer and simpler laws that are actually enforced. The proper role of government is to protect the lives, liberty, rights and property of its citizens. To do this, I will work to eliminate trade deficits and foreign tariffs, reduce taxes, strengthen our military and build a wall to protect our borders. We need to reduce government regulation so businesses can prosper, and we need to stop the pattern of taxpayer-funded corporate welfare. We deserve better-paying jobs and more local control over education. I will fight to preserve our water resources by building adequate water storage, reducing excessive water transfers and improving water run-off from our national forests by removing underbrush. We deserve a government that balances its checkbook, protects us with a strong national defense, creates an equal playing field for businesses and doesn’t force anyone to buy health insurance. I am the first in my family to graduate from high school. My five brothers and I all served in the military. I graduated from the California Military Academy, CSU Sacramento and UCLA School of Law. My wife and I call Chico home, and I’ve worked to bring many tech sector jobs to the area. I pledge to serve no more than 6 years, and I would be honored to have your vote. <p><b>Jim Reed</b>  <b>U.S. Representative, District 1</b>  <b>Electrical Engineer, Attorney &amp; Taxpayer Advocate.</b></p> <p>President Eisenhower warned us about the Military Industrial Complex; his warning has been ignored. The U.S. Military Budget is over \$600 billion this year (more than ½ the total discretionary spending by Congress), larger than China’s, Russia’s, Saudi Arabia’s, France’s, Great Britton’s &amp; India’s Military budgets combined, the 6 largest after the U.S. Much Military spending does not keep us safe, but provides extravagant benefits to certain special interest groups. Spending on infrastructure, at the same time, is ignored. The Army Corp of Engineers estimates it will cost \$4 Trillion to repair &amp; improve the infrastructure in the U.S. Infrastructure repair &amp; improvement will not only make our businesses more competitive, create jobs, and give us a safer place to live, including protecting us from foreign enemies. We won World War II in large part because of our superior infrastructure and manufacturing capacity. I will be a voice in Congress to reallocate substantial spending from Defense to Infrastructure Repair.  My background in Engineering &amp; Law and strong familiarity with the Tax Code gives me insight into what can be done to protect the environment, create jobs, close tax loopholes that favor special interests, and save Social Security &amp; Medicare.  I believe small businesses are over-regulated while large Companies are under-regulated. When it comes to the economy, I believe during hard times it is necessary to spend more than the revenue collected, but in good times we should have a balanced budget. Through bipartisan efforts, I worked across party lines to save our rural hospitals and skilled nursing facilities from closing. Through my district office I have been able to help thousands of people and small businesses with state government agency problems; ensuring that people are represented and heard.</p> <p>California faces many challenges and there is still much work to be done in Sacramento.
