

Candidate: Michael Dale Stierli

Conservative and Transparent Incumbent

Forty Plus Years Mt. Gate Resident

Founder (1982) President MDS Engineering and construction company a local company that has specialized in the water treatment plant construction. Having built the Coleman fish Hatchery filter 2, City of Redding Buckeye filter 2, Lewiston Filter Plant and numerous other plants. Although I am prohibited from contracting with the district my years of experience and knowledge of waterworks projects would be an asset to the districts board management.

I am a strong supporter of the fire and rescue department and its staff and volunteers

I will propose cost cutting measures that will save the district money and avoid any rate increase.

I believe the district should be better advised of board proposed and final actions and that they be published in our newsletter. We need an open, transparent district with accountability.
