

Rebuttal to the Argument in Favor of Measure "A"

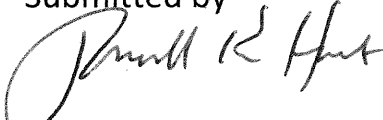

Upon submitting the Argument Against Measure "A", the Redding Police broke into my house with a battering ram for alledged code violations that did not exist. How can we trust the law enforcement bureaucracy when our basic constitutional rights are violated for expressing our opinions ?

The solution to more funding is growth. On Interstate 5, we have the Churn Creek Bottom and 13 interchanges north of Shasta Lake which can be zoned for commercial use. We will be awash in gas, motel, property and sales tax if this is done.

We need citizen drug dog patrols throughout our neighborhoods. We must have a "snitch" program where drug users turn in their dealers for cash. Secret Witness only pays when there is a conviction. Parolees need to be placed in shed villages that they will pay rent for, so we can monitor their behavior, instead of letting them roam freely.

But most importantly is to elect new and reasonable members to the Board of Supervisors who will gladly accept our state tax money for construction of new facilities.
