

I was raised in Burney and Fall River Mills, and graduated from Fall River High School. I have practiced Internal Medicine for 33 years, both in the Intermountain area and outside of the community. I have been in solo practice, group practices, and also worked as a Hospitalist for many years. Health care is rapidly changing. These changes will require the hospital and its services to adjust so to continue to provide the best care for the Intermountain area. I feel that my professional training and years of practice in health care will bring a new perspective to the board.
