

My name is Katie Mason. My family moved to Mountain Gate three years ago, and we were welcomed by this community. I enjoy living here, but I recognize there are some challenges we face in protecting our homes and providing community resources. I want to help my neighbors meet those challenges. I would like to serve this community by promoting positive solutions to our shared issues. I have worked as a firefighter for sixteen years and I teach fire science at College of the Siskiyous. I value fire planning, and believe that I can help develop strategies to protect ourselves and our properties from wildland fires. I am hardworking and have a genuine desire to be involved with and give back to our community.
