

Dear voters, I have served as your councilman for 12 years and ask to be re-elected. I bring common sense and intelligence to this council. I know the history of our city having been born and raised here and graduating from CVHS.

I am a semi-retired registered Civil Engineer and pride myself in researching and understanding issues before the council. I will fight unfunded mandates from Sacramento and have worked to secure a permanent water supply from Shasta Dam. I support law enforcement efforts to keep our city safe.

My wife Lani and I are faithful Christians and attend St. Michaels Catholic Church.

I write this the first week in August knowing things will change. During the pandemic, I pushed to open our outdoor skateboard park while other cities were closing theirs with sand. I believe students need to attend fully open schools and that citizens must be responsible for their own health. Never before have we quarantined the healthy, closed churches, restaurants and schools while allowing big box stores to operate under different rules.
