

CANDIDATE STATEMENT FOR
Shasta County District Attorney
Erik Jensen

Occupation: Attorney At Law

Age: 46

Shasta County is less safe today than it was five years ago. Dangerous homeless encampments, illegal marijuana grows, opioid abuse and theft continue to plague our community.

Hope that some future legislation from Sacramento will solve this problem is not a solution.

Our elected officials have had ample opportunity to address these problems. We need people from outside of the establishment to make the changes necessary to protect our community.

I have been practicing law as an attorney in private industry since 2002. For nearly twenty years, I have served as legal counsel to Fortune 500 companies and local businesses investigating and protecting them against fraud. My clients demand measurable results at a fair price and we should too.

As your District Attorney I will provide law enforcement the support they need to effectively perform their duties. I will fight government corruption, ensure fair elections, and protect the Constitutional rights of our citizens.

I will regularly publish key statistics so that the public can accurately assess my performance with real data, not a handful of accomplishments released to the media.

My wife of 17 years and our four children deserve a better future in Shasta County and so do you!
