

CANDIDATE STATEMENT FOR
Shasta County Supervisor District 1
Kymerly Vollmers

Occupation: Wife, Mother, Educator

Age: 41

My responsibility in representing you will be to keep a critical eye on the best ways to serve the people of Shasta County, as Supervisor. It is important that we protect our land and water, be consistent to improve the economy by promoting progress & economic growth, while we collaborate to find real solutions for public safety. Accumulative real life experiences have provided a value for representing the voice of the people. Having an unconventional education, I have the ability to question methods to result in lasting change. Many companies I have worked for gained profits by allowing me to question the status quo. From a medically-minded background I developed critical-thinking research methodology. Successful communities come together with their expertise in order to make a collective impact for generations. My husband and I want to be proud of the place we call home, we are leaving to our four daughters. I believe in evaluating how the county has done things in the past to break harmful cycles of habit or comfort going forward. I will ask difficult questions, expecting truth and integrity of county operations fairly.

I am here to stand in the gap.

Thank you for your vote.
